– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Davis, et al. (6,343,669) in view of Handa, et al. (20030033874), further in view of Shiraishi (JP62218243).

Davis teaches an ATV having a belt converter. Davis lacks the teaching of a speed detector. Handa teaches an ATV having a speed detector. Based on the teachings of Handa, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the ATV of Davis to have a speed detector to provide a signal when a driver is speeding. Davis in view of Handa teaches the claimed invention except for a backward movement detection mechanism and an engine control mechanism. Shiraishi teaches a backward movement detection mechanism and an engine control mechanism. Based on the teachings of Shiraishi, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the combination of Davis and Handa to have a backward movement detection mechanism and an engine control mechanism to provide a signal

upon a driver backing up in the vehicle and being able to control the vehicle from backing up to provide safety for surrounding pedestrians and/or the driver.

Allowable Subject Matter

3. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Faye M. Fleming whose telephone number is (571) 272-6672. The examiner can normally be reached on M-F (9:00-5:00).
